

HOSPITALITY ORDERING FOR

EDUCATION

The Hospitality Ordering module provides a complete online system for Universities and large educational establishments to manage hospitality, event and conference services across single or multiple locations. Clients using this module typically manage facilities with significant internal and/or external meeting and conference room space. The module provides an online platform for customers to place orders, book space and includes all of the processes needed for a hospitality team to manage, deliver and invoice for the order or booking internally..

IndiCater is a secure password protected system offering clients and users alike peace of mind

Clients control the precise level of access that their system users have to the various module features

24/7

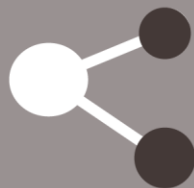

As a web based system Hospitality Ordering can be accessed and used 24/7

Licensed for use on a monthly basis - additional IndiCater modules can be added at any time in bite-size stages

“I NEEDED A SOFTWARE SOLUTION THAT GAVE ME FLEXIBILITY. INDICATER GAVE ME THAT IN ABUNDANCE”

Gordon Vaughan - site Customer Experience Manager, Sodexo

Third Party Applications

IndiCater modules are seamlessly linked to 3rd party applications such as SAP, Sage, J D Edwards, APTOS, TISSL, Centegra and more.

Data can be IMPORTED into IndiCater from EPoS and Cashless systems and EXPORTED into accounts and payroll systems

- Customer order status view
- Optional pre set delivery times
- Create special promotions
- Dual tariff option for internal or external customers
- Comprehensive reports
- Retail shop feature
- Room & Sports facility booking feature

Taking a closer look...

Hospitality Ordering can be tailored and branded, and its use protects the bottom line. Everything that is ordered is captured and processed through the system eliminating errors, reducing waste and speeding up payment timelines. Customers have access to a simple, easy to use system which is accessed via the web using tablets or other hand held devices and encourages trading up or taking advantage of ever changing special offers and promotions. Menus and tariffs can be changed with ease and adjustments made in line with product prices, seasonality and availability.

NEW! Room Booking, Sports Booking and an Online Retail Shop option is now available as part of Hospitality Ordering or as a stand alone tool.

Reports and exports

Where internal recharging for hospitality services is not appropriate, a default Shopping Basket has been integrated with Sage Pay which allows for secure online payments to be made using credit or debit cards. Sage Pay is configured with a client's own Merchant Account number and provides direct access for managing credits and reviewing data transactions for bank reconciliations.

Hospitality Ordering can be integrated with other payment systems if required.

For clients using additional IndiCater modules such as Finance and Flash Reporting, all sales are seamlessly shown in the Income and Reporting sections, and can be exported to any accounting application.

WHAT PEOPLE SAY ABOUT US

"The application to detail and flexibility of the IndiCater project management and technical team when working with our business and technical staff made the initiative a success"

Richard Baxter - Head of IT, ARAMARK
