

WORKING WITH

RESTAURANTS & HOTELS

IndiCater is one of the UK's leading providers of web based back of house management software systems to the hospitality industry. We specialise in providing our clients with a unique range of applications that manage and control costs, and drive business efficiency - at an affordable entry point. Our software stands out because it has been designed specifically for the needs of the hospitality industry by professionals who have worked within the sector and understand its needs.

IndiCater is a secure password protected system offering clients and users alike peace of mind

Clients control the precise level of access that their system users have to the various modules and features

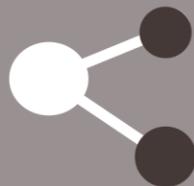

24/7

As a web based system all modules and tools can be accessed remotely 24/7

Modules are licensed on a monthly basis and can be added to at any time in bite-size stages

“The IndiCater team are always on hand to SOLVE challenges and provide SUPPORT to my team”

Third Party Applications

Modules and tools can be seamlessly linked to 3rd party applications such as SAP, Sage, J D Edwards, Snowdrop, TISSL, Centegra and more. Data can be **IMPORTED** into IndiCater from EPoS and **EXPORTED** into accounts and payroll systems

Key module features

- **Finance and Profit** – *cash management, control and bank reconciliation; budgeting; import and export data from EPoS; extensive trade KPI reporting*
- **StORM** [**Stock:Ordering:Recipes:Menus**] - *Create and cost recipes, cocktails and beverages; detailed stock take; create orders; produce allergen and nutritional data; create menus*
- **e-Procurement** – *Online ordering; manage supplier catalogues; EDI. Can be used in conjunction with StORM*
- **Employment & HR** – *employ; schedule; monitor and manage staff. From engaging a new starter through to staff rotas, absence management, timesheets and TUPE*

Taking a closer look...

With over 7 core modules and 100's of tools from which to select, our core management control processes encompass everything from accounts data capture, stock control and recipe management, through to employment and business monitoring processes. Modules and tools can be licensed individually or packaged together as a suite.

Our clients including Restaurants, Hotels, Contract Caterers, FM providers, Schools and Universities, Visitor Attractions, NHS, and Event Caterers have access to key site operating data from any location at any time, enabling them to take full control of their businesses. Our modules and tools can all be tailored and branded for each client, and come with the added flexibility of being able to start small and bolt on additional applications as business needs dictate.

Reports and exports

As a web-based back office management system, IndiCater not only provides a platform for trading information to be recorded at site level, but crucially this provides immediate and live access to a comprehensive series of management reports which help to shape company decision making. A Data Cube tool will be launched shortly.

Once checked and signed off, data exports can be set up which are linked directly with accounts and payroll packages.

Using a combination of reports and exports clients have reported improvements to their bottom line of between 3% to 15%.

WHAT PEOPLE SAY ABOUT US

“The move to IndiCater is showing strategic and commercial benefits with notable improvements to the bottom line”
